

PAGNONI IMPIANTI

Monza - Italia

PAGNONI, leader in pressing technology for

- particle board
- medium density fiberboard (MDF)
- plywood
- decorative HPL
(High Pressure Laminates)
- melamine and phenol faced panel
Short-Cycle Lamination
- **Pagnoni EASYLAM®**
the continuous way of laminating
and bonding
- cement-bonded particleboard
- rubber belts & industrial products
- paper & paperboard reconstitution
- PVC & polypropylene plates
- cork plates and panels
- reconstituted leather
- reconstituted marble
- Roll Bond (evaporator boards)
- industrial laminates
- special products

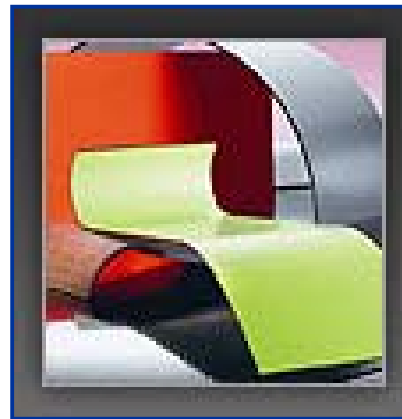

HPL

High Pressure Laminates

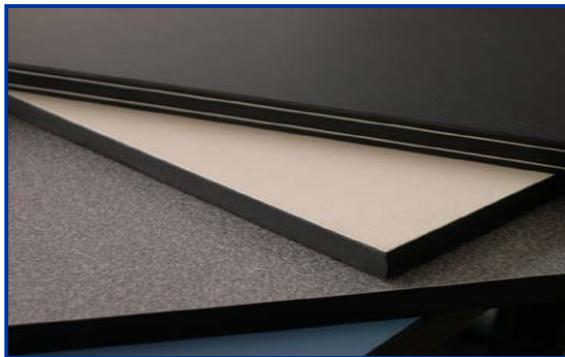

Final products: HPL, CPL and compact for all industries

- furniture, kitchens, tops

- hpl compact for **building industry**: outdoor and indoor

HPL

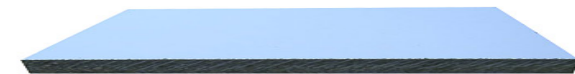

High Pressure Laminates

Final products:

- flooring
- components
- worktops and cabinet doors
- indoor wall covering and lining

- transport
- postforming HPL and CPL for doors, shelves, worktops
- waterproof panels for road posters

HPL

High Pressure Laminates

HPL

High Pressure Laminates

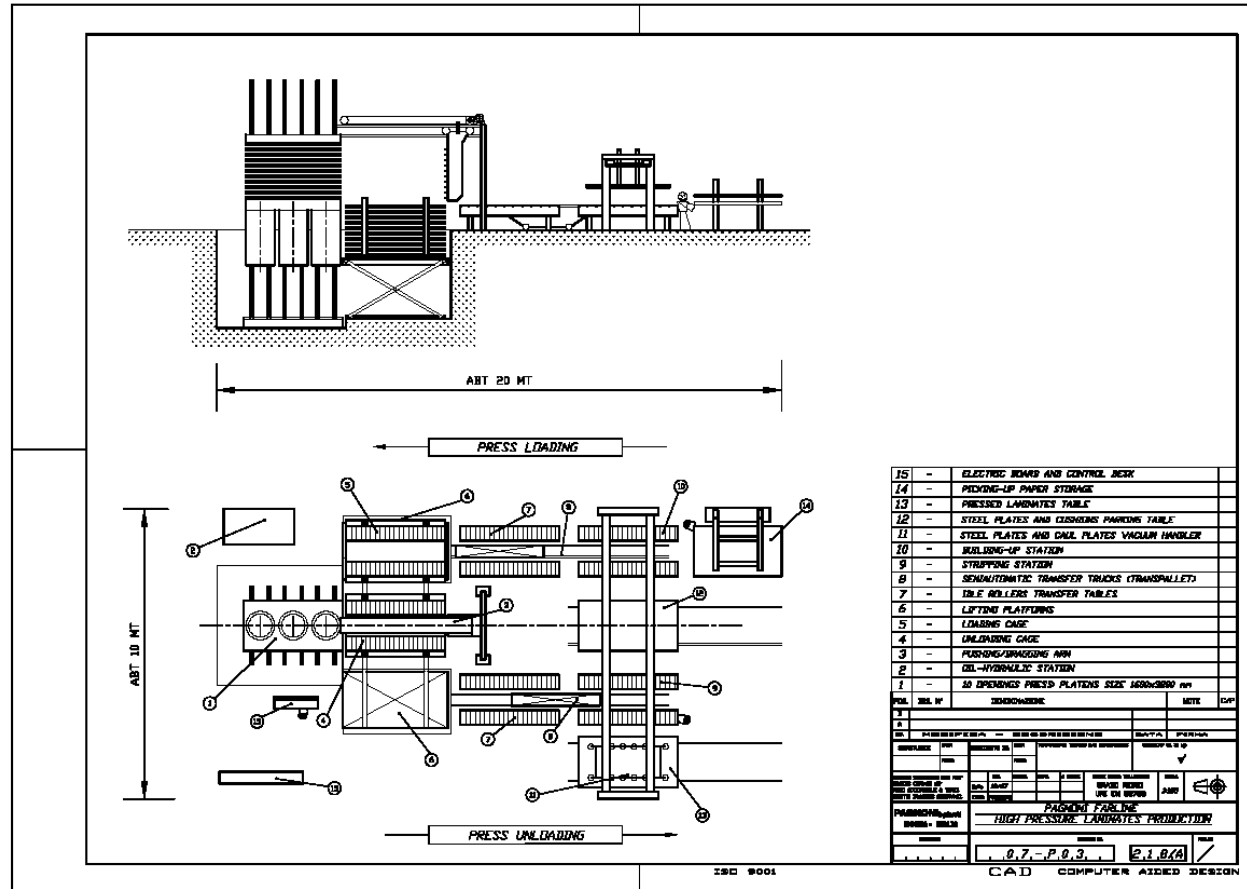

- huge number of lines built all over the world:
more than 80 lines installed!
- great technical and technological experience
- multi-opening and single-opening presses
- full products range: laminates of all thickness and compact

- platens size up to
2200 x 6350 mm
- customized plants
- construction stoutness,
easy-handling systems
- patents, special features,
all technical solutions

Pagnoni FARLINE

standard HPL press line complete, friendly, reliable, inexpensive

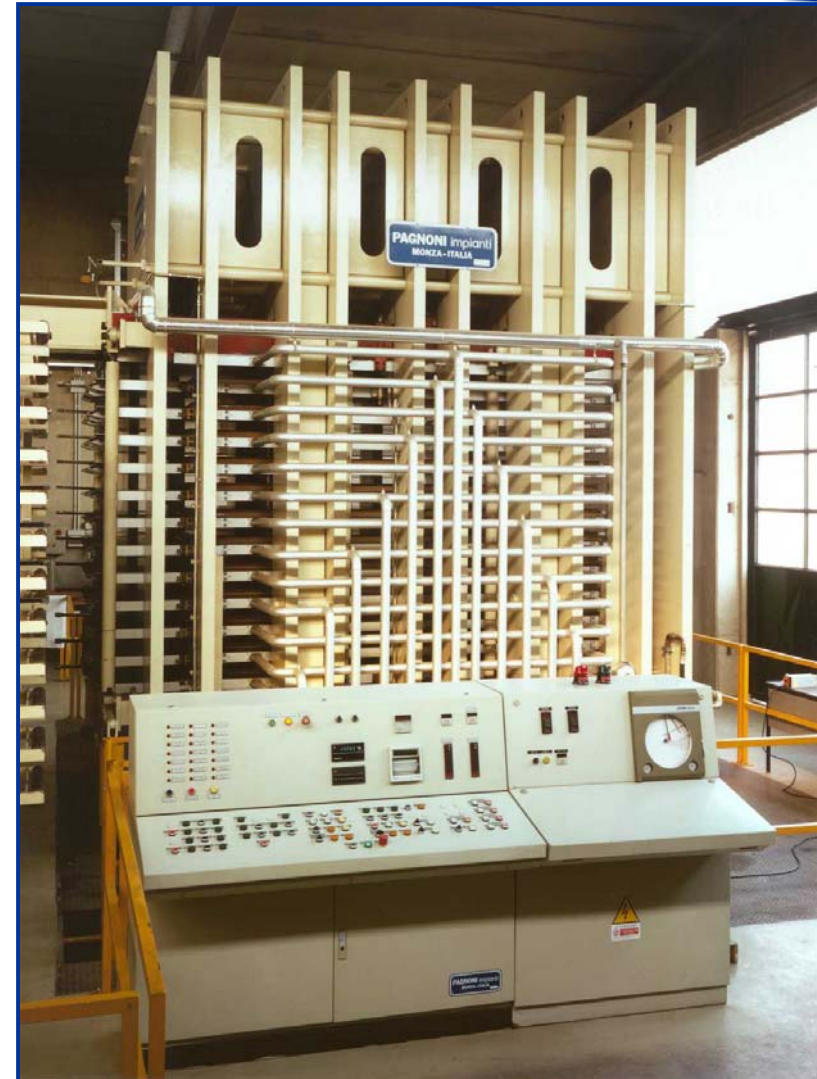

Pagnoni **FARLINE**, the high quality answer to the expensive and complex HPL proposed on the market

Pagnoni FARLINE

standard HPL press line complete, friendly, reliable, inexpensive

The standard HPL line featuring:

- ▶ premium quality production
- ▶ reliable and users friendly
- ▶ constant output
- ▶ all thickness laminates processing
- ▶ several standard models:
 - platens size **1600x3200 mm** - 12 openings
 - 1600x3800 mm** - 10 openings
 - 1400x4400 mm** - 10 openings
- ▶ low investment cost
- ▶ small running cost
- ▶ low maintenance cost
- ▶ complete with boiler and thermal circuit
- ▶ simple press heating and cooling system
- ▶ fast installation for immediate running

Pagnoni FARLINE

standard HPL press line complete, friendly, reliable, inexpensive

- ❖ steady design
- ❖ up-stroke closing
- ❖ annual production above 3.000.000 m²/year
- ❖ specific pressure **80 kg/cm² (*)**
- ❖ high thermal efficiency
- ❖ thermal circuit with thermal oil, allowing important energy savings

(*) As per European standard UNI EN 438, certified HPL must be pressed at a pressure not lower than 7 MPa (70kg/cm²)

Pagnoni FARLINE

standard HPL press line complete, friendly, reliable, inexpensive

Pagnoni **FARLINE**:

- simple, strong, efficient, fast!
- reliable!
- inexpensive!
- first quality production!
- Pagnoni 12 months full guarantee!
